Waterproof wall system

Innovative waterproof SPC tiles

Waterproof TEXANA Tiles, made of over 70% of mineral core, finished with high-quality UV coating, is an outstanding material for domestic and commercial use, both in new projects and renovations.

Versatility of TEXANA Tiles allows for many application possibilities – wall coverings in wet & dry areas, decorative finishes, doors and entrance portals or even waterproof furniture.

Extraordinary format

TEXANA Tiles is a range of slim and lightweight slabs.

Large format (2.800 x 1.220mm) allows to cover full height of walls in most apartments and houses.

Appearance of natural wood and stone

TEXANA Tiles designs are digitally printed, reflecting down to the smallest detail the rich grain of wood and roughness of stones and concrete.

Easy handling & installation

Designed with utmost care of easy handling and installation; can be cut, shaped, drilled and most of all, installed on different subsurfaces: ceramic tiles, gypsum plaster, concrete, plywood or osb.

Characteristics

Waterproof

TEXANA Tiles is suitable for indoor use in dry and humid conditions, such as bathroom, laundry room, kitchen or vestibule.

Digital Design

Authentic appearance of wood, stones and metals thanks to digital print technology finished.

Soft touch

TEXANA Tiles have a soft, pleasant surface with comfortable and warm tactile sensation.

Fire resistant

Dimensionally stable

TEXANA Tiles does not change its dimensions under the influence of temperature and humidity changes, so it can be used indoor in sunny areas as well as in dry and humid ones.

Scratch resistant

TEXANA Tiles are well-protected against fine scratches and everyday wear and tear thanks to durable top surface layer

Stain proof and easy to clean

TEXANA Tiles meets stain resistance requirements, which might be caused by most common substances used in your living space: coffee, tea, wine and other beverages, cleaning agents used in kitchen, laundry, and care products used in bathroom.

ADVANTAGES

Waterproof

SPC UV BOARD has the advantage of being waterproof and moisture-resistant, addressing the weakness of traditional wall panels that are susceptible to water.

Fireproof

The combustion test level reaches B1, and the material is effectively fireproof.

Eco-Friendly

Eco-friendly and formaldehyde-free, it is a new type of green and environmentally friendly decorative material.

Easy to Install

Installation is convenient, saving a considerable amount of time and money

Easy to clean

The surface is smooth and easy to clean, preventing the accumulation of stains.

Diverse design options

Offers a wide range of textures and colors suitable for various interior design styles, meeting diverse needs.

- **SPC Rigid Core** High-performance composite panels that combine the exceptional qualities of stone and plastic, delivering outstanding strength and resilience.
- **UV Coating Layer** High-performance UV coating treatment can effectively prevent damage to the board caused by ultraviolet rays.
